

Luisa Hernandez

Tech Lead & Founding AI Engineer

📞 3195162888 ✉️ lmhm0928@gmail.com 📍 Bogotá, CO, Colombia

Summary

Fullstack Tech Lead with a proven track record (\$2.0M AI startup exit) in production-grade AI systems that survive real-world scale and load. Co-founded Closer AI (\$25k MRR), architecting the platform from 0 to 1 and leading the technology through an acquisition by a US-based firm.

Specialist in multi-agent systems, high-scale RAG, and AWS AI cloud deployment.

Experience

Tech Lead & Founding AI Engineer Aug 2025 - Present
Closer AI
Bogotá, CO, Colombia

Architected, built, and scaled an end-to-end autonomous AI platform from concept to production, leading to a \$2.0M acquisition/merger by a US-based company.

- **0-to-1 Product Engineering:** Designed and scaled a multi-tenant WhatsApp commerce platform handling 10k+ daily active customer conversations and driving \$25k MRR prior to acquisition.
- **Multi-Agent Systems:** Built multi-agent workflows using Python and LangGraph with 70% Human-in-the-Loop Automation and 35% Latency Reduction in Enterprise APIs.
- **Production RAG & Vector Search:** Engineered high-fidelity RAG pipelines to support +120k files, implementing custom chunking, re-ranking, and dynamic prompting to eliminate hallucinations and secure grounded outputs
- **Observability & Evals:** Established end-to-end system telemetry and evaluation frameworks on AWS to continuously monitor latency, failure modes, token cost per execution, and response quality
- **Infrastructure:** Deployed scalable backend microservices (Node.js/AWS) with zero-downtime CI/CD deployment pipelines, maintaining high availability during peak traffic spikes

Skills

Python	Expert
TypeScript	Expert
Node.js	Expert
AWS (ECS, Bedrock, Lambda, RDS)	Expert
LangGraph	Expert
MCP	Expert
RAG Optimization	Expert
Vector DBs	Expert
CI/CD Pipelines	Expert
Docker	Expert
LangSmith	Expert
Redis Caching	Expert
PostgreSQL	Expert

Languages

English	Fluent

Senior Software Engineer

Jun 2024 - Aug 2025

Globant

Bogotá, CO, Colombia

Led full-stack engineering initiatives for enterprise SaaS products serving 50k+ daily active users.

- **Performance Optimization:** Refactored heavy backend APIs and data fetching pipelines, reducing network payload sizes and boosting system response times by 35%
- **Architectural Standard:** Designed shared modular component libraries and core business logic adopted across 5 engineering teams, cutting cross-team feature delivery time by 40%
- **Quality & Leadership:** Mentored 3 junior developers and 2 mid level developers on system design and production-grade practices.
- **Testing:** increased automated test coverage from 45% to 90% using Jest and Vitest.

Mid-Level Software Engineer

Oct 2022 - Jun 2024

Nice Actimize

Bogotá, CO, Colombia

Engineered high-throughput financial compliance systems processing 1M+ daily transactions.

- **High-Volume Systems:** Developed distributed caching layers (Redis) and profiled database query bottlenecks, reducing system load times by 28% under extreme throughput.
- **Refactoring & Modernization:** Redesigned core incident management data models and workflows, cutting production issue resolution time.

Software Engineer

Jun 2021 - Oct 2022

Avianca

Bogotá, CO, Colombia

- Built airline-wide data analytics engines and internal tooling adopted by 400+ operational users.
- Refactored core data pipelines to improve critical reporting accuracy by 32%
- Developed RESTful APIs and integrated third-party services to expand application functionality.

Accomplishments

\$2.0M Startup Exit (Closer AI) - Closer AI, 2026

Top Performer Employee - Nice Actimize, 2023

Education

Computer Science Studies - Associate's Degree

El Instituto Tecnológico y de Estudios Superiores de Monterrey - Tec Monterrey

2019 - 2021 Puebla, Mexico

Economics - Bachelor's Degree

B.A. in Economics

2017 - 2021 Bogotá D.C, Colombia
